AIR SYSTEMS

Covid Relief Funds Available For Indoor Air Quality

We are currently offering
volume discounts to schools
looking to place large orders

Specifications:
Dimensions: 14.5 L x 14.5 W x 23 H
Weight: 47 lbs
3 speed centrifugal Fan
CSA approved
250 cubic feet per minute (CFM) on highest setting
(Classroom example: 12'x12'x8' = 13 Air Changes/Hour)
5-Year Mechanical Warranty
HEPA Filter

Why we need HEPA air filtration at school

The World Health Organization and the CDC have both recommended HEPA Air Filtration to reduce the risk of COVID-19 indoors.

Many Indoor environments do not provide adequate ventilation or filtration. Using a portable HEPA air purifier is a cost-effective way to ensure contaminants are removed from the air. Austin Air's Medical Grade HEPA technology is certified to remove 99.97% of all particles larger than 0.3 microns and up to 95% of all particles larger than 0.1 microns and are highly effective at removing airborne viruses and bacteria as well as other airborne allergens.

Studies support the use of purifiers in schools

A study from Frankfurt, Germany investigated ways to reduce the risk of Covid-19 in schools. They found that running a HEPA air purifier in classrooms reduces aerosol concentrations by more than 90% in under 30 minutes.
